Easy English

Most people don't want to understand a VPN. They just want to know one thing: am I protected?

That one question shaped every screen of Fast VPN.

At Adelogix Software Technology, we designed, developed and delivered Fast VPN, an iOS app that connects people to a secure server in a single tap.

The challenge VPN apps can feel technical. Servers, protocols, security settings and subscriptions all compete for attention. But users need one clear answer, fast.

Our approach One main button, then clear proof. After connecting, the app shows the session timer, IP address and live download and upload speeds, so users can see they are protected.

What we built

- One-tap connect with a live session timer and IP address
- Server locations with Free and Premium tabs, search and signal strength
- A built-in speed test: download, upload, ping, jitter and packet loss, with history
- Premium plans from 1 month to 2 years, with PayPal, Google Pay, Apple Pay and card
- Face ID, Touch ID and PIN security
- 193 screens designed in light and dark mode, on one shared design system

Project details

- Year: 2025
- Timeline: 2–2.5 months
- Scope: UI/UX design, design system, development and delivery

Good security apps don't make people feel smart or confused. They make people feel safe.

Building a mobile app that has to feel simple, even when the product is complex? Let's talk. 🌐 adelogix.com

Zyada tar log VPN ko samajhna nahi chahte. Unhein sirf ek baat janni hoti hai: kya main protected hoon?

Isi ek sawal ne Fast VPN ki har screen ko shape kiya.

Adelogix Software Technology mein humne Fast VPN design, develop aur deliver kiya. Ye ek iOS app hai jo sirf ek tap mein user ko secure server se connect kar deti hai.

Challenge VPN apps aksar technical lagti hain. Servers, protocols, security settings aur subscriptions sab ek saath user ke saamne aa jaate hain. Lekin user ko bas ek clear jawab chahiye, aur jaldi.

Hamara approach Ek main button, phir clear proof. Connect hone ke baad app session timer, IP address aur live download aur upload speed dikhati hai, taake user ko nazar aaye ke woh protected hai.

Humne kya banaya

- One-tap connect, live session timer aur IP address ke saath
- Server locations: Free aur Premium tabs, search aur signal strength
- Built-in speed test: download, upload, ping, jitter aur packet loss, history ke saath
- Premium plans 1 month se 2 years tak, PayPal, Google Pay, Apple Pay aur card ke saath
- Face ID, Touch ID aur PIN security
- 193 screens light aur dark mode mein, ek hi design system par

Project details

- Saal: 2025
- Timeline: 2–2.5 months
- Scope: UI/UX design, design system, development aur delivery

Achhi security app user ko confuse nahi karti. Usay mehfooz mehsoos karwati hai.

Aap bhi aisi mobile app bana rahe hain jo complex ho lekin simple lagni chahiye? Baat karte hain. 🌐 adelogix.com

🔒 **Private browsing, one tap away.**

What if a VPN app didn't feel technical at all?

That was our goal with Fast VPN, an iOS app designed, developed and delivered by Adelogix Software Technology in 2025.

- ✅ One tap to connect
- ✅ Live session timer, IP address and speeds
- ✅ Free and Premium server locations
- ✅ Built-in speed test with history
- ✅ Face ID, Touch ID and PIN security
- ✅ Full light and dark mode, 193 screens

From the first idea to the final app, we handled the complete project in about 2–2.5 months.

🔒 **Private browsing, sirf ek tap door.**

Socho agar VPN app bilkul bhi technical na lage?

Fast VPN ke saath hamara yehi goal tha. Ye iOS app Adelogix Software Technology ne 2025 mein design, develop aur deliver ki.

- ✅ Ek tap mein connect
- ✅ Live session timer, IP address aur speeds
- ✅ Free aur Premium server locations

- ✅ Built-in speed test, history ke saath
- ✅ Face ID, Touch ID aur PIN security
- ✅ Poora light aur dark mode, 193 screens

Pehle idea se le kar final app tak, poora project humne taqreeban 2–2.5 months mein complete kiya.

Project title: Fast VPN | iOS VPN App UI/UX Design & Development Case Study

Tagline: Private browsing, one tap away.

Easy English

Fast VPN is an iOS app that connects people to a secure server in a single tap. Adelogix Software Technology designed, developed and delivered the complete project in 2025, over about 2–2.5 months.

The challenge

VPN apps often feel technical. Servers, protocols, security options and subscriptions add complexity, while most users only want to know one thing: am I protected right now?

The solution

We built the app around one large connect button and clear proof after connecting: a session timer, the IP address and live download and upload speeds. Everything else, from locations to settings, sits one step away from the home screen.

Key features

- One-tap connect with a live session status
- Server locations with Free and Premium tabs, search and signal strength
- Speed test with download, upload, ping, jitter, packet loss, charts and history
- Premium plans: 1 month, 6 months, 1 year and 2 years
- Payment with PayPal, Google Pay, Apple Pay and card
- Face ID, Touch ID and PIN security
- Settings for language, connection mode, notifications and dark mode

Design system

A warm amber gradient (#FFC700 → #FF9900), Poppins type styles, outline and bold icons, and shared components keep 193 screens consistent across light and dark mode.

- Scope: UI/UX design · Design system · Development · Delivery
- Platform: iOS
- Year: 2025

Roman English

Fast VPN ek iOS app hai jo sirf ek tap mein user ko secure server se connect kar deti hai. Adelogix Software Technology ne ye poora project 2025 mein design, develop aur deliver kiya, taqreeban 2–2.5 months mein.

Challenge

VPN apps aksar technical lagti hain. Servers, protocols, security options aur subscriptions app ko complex bana dete hain, jab ke user sirf ye janna chahta hai: kya main abhi protected hoon?

Solution

Humne app ko ek bare connect button ke gird banaya, aur connect hone ke baad clear proof diya: session timer, IP address aur live download aur upload speed. Baaqi sab kuch, locations se settings tak, home screen se sirf ek step door hai.

Key features

- One-tap connect, live session status ke saath
- Server locations: Free aur Premium tabs, search aur signal strength
- Speed test: download, upload, ping, jitter, packet loss, charts aur history
- Premium plans: 1 month, 6 months, 1 year aur 2 years
- Payment: PayPal, Google Pay, Apple Pay aur card
- Face ID, Touch ID aur PIN security
- Settings: language, connection mode, notifications aur dark mode

Design system

Warm amber gradient (#FFC700 → #FF9900), Poppins type styles, outline aur bold icons, aur shared components ki wajah se 193 screens light aur dark mode dono mein consistent hain.

- Scope: UI/UX design · Design system · Development · Delivery
- Platform: iOS
- Saal: 2025

7. Search keywords and posting tips

Search keywords (SEO and profile search): VPN app UI design, iOS VPN app, mobile app case study, VPN app development, light and dark mode app, app design system, speed test app UI, secure app design, mobile app development company Pakistan, UI/UX agency Bahawalpur, Adelogix Software Technology

Posting tips

- Keep the first 2 lines of every post as they are. They are the hook that shows before "see more".
- Post on Behance first, then add the Behance link to the Dribbble and LinkedIn posts.
- On Instagram, post all 9 images as one carousel, in order from 01 to 09.
