TruNext Case Study: Social Media Posts (2026)

Nov 5, 2026 · @Uzair Rasheed

2026 rules followed

Every post below follows the current platform rules and uses only facts from the design file: no return figures, no "guaranteed" wording, no invented results.

Platform	Rule applied	Source
Instagram	Max 5 hashtags per post or Reel, caption and first comment combined	InstantDM, SocialCal
LinkedIn	Hook in the first ~150 characters, before "see more"	Wild and Free Tools
LinkedIn	Keywords in the sentences, 3–4 hashtags	LinkedInPreview
LinkedIn	PDF carousel has high reach for case studies	Socialkit
LinkedIn	Links: sources disagree; keep the body link-free and put the Behance link in the first comment (end of post also works)	Digital Applied, Jobmentis
Dribbble	Up to 20 tags, 10–15 relevant ones work best; irrelevant tags lower ranking	Dribbble Help, Postiz
Behance	5–10 relevant tags, broad and niche mixed	UniLink

English

Hook: Crypto apps don't lose users because of the market. They lose them because nobody can find their own balance.

Re-hook: So for TruNext, we designed one rule into every screen: money should always be easy to read.

Details:

TruNext is a crypto investment platform built around GNSE, its gold-backed token. Our team at Adelogix designed the full UI/UX across three surfaces:

→ **User web app:** dashboard, investment packages, GNSE investment, referrals, Skrill, wallet and cashout

→ **Mobile app:** the same investor flows, sized for one hand

→ **Admin panel:** users, investments and package management for the TruNext team

A few decisions we're proud of:

- **Four packages, one card pattern.** Silver, Gold, Platinum and Diamond all show the same four facts in the same place, so comparing them takes seconds.
- **Two balances, one card.** USDT and Gold-Backed Tokens sit side by side, with Deposit and Withdraw right below.
- **One money-movement pattern.** Link Skrill once. After that, every deposit, withdrawal and cashout works the same way: fill in, check the summary, confirm, see a clear success state.
- **Clear status on every row.** Every transaction says Completed or Uncompleted. No guessing.
- **Onboarding in four short steps.** Create account → verify email → enter OTP → log in.

The visual system is deliberately calm: deep navy, white cards, small sparklines and a touch of 3D gold. When the product is about money, calm means trust.

Question to drive comments: When you open a finance app, what do you need to see first: your total balance or your recent activity?

#UXDesign #FintechDesign #ProductDesign #CryptoApp

First comment: Full case study on Behance: [your Behance link]

Roman English

Hook: Crypto apps market ki wajah se users nahi khote. Woh isliye khote hain kyunki user ko apna balance hi nahi milta.

Re-hook: Isliye TruNext ke liye humne har screen par ek hi rule rakha: paisa hamesha aasani se samajh aana chahiye.

Details:

TruNext ek crypto investment platform hai jo GNSE, yaani apne gold-backed token, ke around bana hai. Adelogix ki team ne iska poora UI/UX teen jagah design kiya:

→ **User web app:** dashboard, investment packages, GNSE investment, referrals, Skrill, wallet aur cashout

→ **Mobile app:** wohi saare investor flows, ek haath se use karne ke liye

→ **Admin panel:** TruNext team ke liye users, investments aur package management

Kuch decisions jin par hum proud hain:

- **Chaar packages, ek hi card pattern.** Silver, Gold, Platinum aur Diamond, sab mein wohi chaar facts usi jagah, taake compare karna seconds ka kaam ho.
- **Do balance, ek card.** USDT aur Gold-Backed Tokens saath saath, aur neeche Deposit aur Withdraw.
- **Paisa move karne ka ek hi tareeqa.** Skrill ek baar link karo. Phir har deposit, withdrawal aur cashout same chalta hai: form bharo, summary check karo, confirm karo, aur clear success message dekho.
- **Har row par clear status.** Har transaction par Completed ya Uncompleted likha hai. Koi guesswork nahi.
- **Sirf chaar steps mein signup.** Account banao → email verify karo → OTP dalo → login.

Visual system jaan boojh kar calm rakha: deep navy, white cards, chhoti sparklines aur thoda 3D gold. Jab baat paise ki ho, calm design hi trust banata hai.

2. Facebook

English

Hook: Most people close a crypto app in seconds because it looks complicated. We designed TruNext so that doesn't happen. 💡

Re-hook: Here's how we made a crypto investment platform feel simple, from sign-up to cashout.

Details:

TruNext is a crypto investment platform built around GNSE gold-backed tokens. We designed the complete experience:

- ✅ A web app for investors
- ✅ A mobile app with the same flows
- ✅ An admin panel for the TruNext team

What makes it easy to use:

- 🔹 Four investment packages, each shown on the same clear card
- 🔹 USDT and Gold-Backed Token balances in one place
- 🔹 Skrill linked once, then the same simple steps for every deposit, withdrawal and cashout
- 🔹 A referral program with one link to share and live tracking
- 🔹 Sign-up in just four short steps

Roman English

Hook: Zyada tar log crypto app kuch hi seconds mein band kar dete hain kyunki woh complicated lagti hai. TruNext ko humne aisa design kiya ke yeh na ho. 💡

Re-hook: Dekhein humne ek crypto investment platform ko signup se cashout tak simple kaise banaya.

Details:

TruNext ek crypto investment platform hai jo GNSE gold-backed tokens par based hai. Humne poora experience design kiya:

- ✅ Investors ke liye web app
- ✅ Wohi flows ke saath mobile app
- ✅ TruNext team ke liye admin panel

Use karna aasan kyun hai:

- 🔹 Chaar investment packages, har ek same clear card par
- 🔹 USDT aur Gold-Backed Token balance ek hi jagah
- 🔹 Skrill ek baar link, phir har deposit, withdrawal aur cashout ke same simple steps
- 🔹 Referral program: share karne ke liye ek link, aur live tracking
- 🔹 Sirf chaar chhote steps mein signup

3. Instagram

A carousel post with all 12 images. Replace @adelogix with your real Instagram handle.

English

Hook (first line): Crypto, but finally easy to read. 👀

Re-hook: Swipe to see how we designed TruNext → web, mobile and admin.

Details:

TruNext is a crypto investment platform built around GNSE gold-backed tokens.

What's inside:

- 4 investment packages, one clear card pattern
- USDT + gold-backed token wallet
- Skrill deposits, withdrawals and cashout
- Referral program
- Full admin panel
- 4-step onboarding

Deep navy, white cards, a little 3D gold. Calm design for money. ✨

4. Behance

Project title: TruNext: Crypto Investment Platform UI/UX Case Study

Tagline: Web app, mobile app and admin panel for GNSE gold-backed token investing.

Description (English)

Hook: In a crypto product, every confusing screen costs trust.

Re-hook: TruNext needed a platform where investors always know where their money is and what happens next.

Overview: TruNext is a crypto investment platform built around GNSE, its gold-backed token. Investors choose an investment package, invest in GNSE, track their USDT and token balances, invite friends, and withdraw through Skrill. The TruNext team manages users, investments and packages from a dedicated admin panel.

Our role: UI/UX design, 2026

Platforms: User web app · Mobile app · Admin panel

Key design decisions:

1. **One system, three surfaces.** The web app, mobile app and admin panel share one navy-and-white interface, so a balance or a plan looks the same everywhere.
2. **Comparable packages.** Silver, Gold, Platinum and Diamond use the same card, with term, minimum deposit, maximum deposit and capital return in the same place.
3. **A clear wallet.** USDT and Gold-Backed Token balances share one card. Every transaction shows amount, fee, ID and status.
4. **One money-movement pattern.** Link Skrill once. Then deposits, withdrawals and cashouts all follow the same steps: fill in, review, confirm, success.
5. **Referrals in one place.** One link to share, plus total, pending and completed referrals and earnings. History and withdrawal sit in tabs.
6. **Admin control.** Dashboard, User Management, Investment Overview and Package Management.
7. **Short onboarding.** Create account, verify email, enter OTP, log in.

Visual style: Poppins typography, deep navy and white, green and red status colours, and 3D coin illustrations for warmth.

Thank you for watching. 🙏

Designed by Adelogix Software Technology · adelogix.com

Description (Roman English)

Hook: Crypto product mein har confusing screen trust kam karti hai.

Re-hook: TruNext ko aisa platform chahiye tha jahan investor ko hamesha pata ho ke uska paisa kahan hai aur aage kya hoga.

Overview: TruNext ek crypto investment platform hai jo GNSE, apne gold-backed token, ke around bana hai. Investor package choose karta hai, GNSE mein invest karta hai, USDT aur token balance track karta hai, doston ko invite karta hai, aur Skrill se withdraw karta hai. TruNext team admin panel se users, investments aur packages manage karti hai.

Hamara role: UI/UX design, 2026

Platforms: User web app · Mobile app · Admin panel

Main design decisions:

1. **Ek system, teen surfaces.** Web, mobile aur admin teeno ka ek hi navy-white interface.
2. **Compare karne layak packages.** Silver, Gold, Platinum, Diamond, sab ek hi card par, wohi chaar facts usi jagah.
3. **Clear wallet.** USDT aur Gold-Backed Token ek card mein, har transaction par amount, fee, ID aur status.
4. **Paisa move karne ka ek pattern.** Skrill ek baar link, phir har deposit, withdrawal aur cashout ke same steps.
5. **Referrals ek jagah.** Ek share link, total, pending, completed referrals aur earnings.
6. **Admin control.** Dashboard, User Management, Investment Overview, Package Management.
7. **Chhota onboarding.** Account, email verify, OTP, login.

Dekhne ka shukriya. 🙏

5. Dribbble

Post as a series with the Hero as the first shot. Dribbble's guidelines discourage links and sales pitches in shot descriptions, so these are written to be purely about the work.

Shot title: TruNext: Crypto Investment Dashboard

Description (English)

Crypto investing, designed to be easy to read.

TruNext is a crypto investment platform built around GNSE gold-backed tokens. This shot shows the investor dashboard: total balance, Deposit and Withdraw, token balance, earnings, referrals and active investments, all on one calm screen.

The full project covers a web app, a mobile app and an admin panel, with four investment packages, a USDT and gold-backed token wallet, a Skrill cashout flow and a referral program.

Deep navy, white cards, Poppins, and a little 3D gold.

Which screen should we share next: the wallet or the mobile app? 👇

Description (Roman English)

Crypto investing, aisa design jo samajh mein aaye.

TruNext ek crypto investment platform hai jo GNSE gold-backed tokens par bana hai. Is shot mein investor dashboard hai: total balance, Deposit aur Withdraw, token balance, earnings, referrals aur active investments, sab ek calm screen par.

Poore project mein web app, mobile app aur admin panel hai, saath mein chaar investment packages, USDT aur gold-backed token wallet, Skrill cashout flow aur referral program.

Agli screen kaunsi share karein: wallet ya mobile app? 👇

5. TruNext: Mobile App
6. TruNext: Admin Panel

6. X (Twitter) thread

1/ Crypto apps don't lose users to the market. They lose them to confusing screens.

Here's how we designed TruNext, a crypto investment platform for GNSE gold-backed tokens 🧵

2/ 3 surfaces, 1 system:

→ Web app for investors

→ Mobile app

→ Admin panel for the team

Same navy and white UI everywhere.

3/ 4 packages, 1 card pattern.

Silver, Gold, Platinum and Diamond show the same 4 facts in the same place. Comparing takes seconds.

4/ Link Skrill once. Then every deposit, withdrawal and cashout follows the same steps:

Fill in → Review → Confirm → Success ✅

5/ Designed by Adelogix.
