XENPOP: Social Media Posts

Nov 2, 2026 · @Uzair Rasheed

1. LinkedIn

Easy English

Most crypto apps feel built for experts. XENPOP was built for everyone else.

One tap a day. That's the whole idea.

At Adelogix Software Technology, our team designed and developed XENPOP, a community-powered crypto mining platform. People mine and earn coins from their phone, with no special hardware and no technical setup.

But a mining app is only one part of the product. We built the full platform:

📱 **Mobile app (76 screens)**

- Tap-to-mine sessions with a live countdown and hourly rate
- Step-by-step KYC with document photos and a face check
- Wallet to send and receive coins, with QR codes
- Invite friends, a leaderboard and market statistics
- Support chat, notifications and two-factor authentication

🌐 **Website**

A dark, focused landing page that explains XENPOP and leads visitors to the iOS and Android downloads.

🖥️ **Admin panel (16 screens)**

A web panel where the team reviews KYC requests, manages users and roles, follows transactions, publishes announcements and answers support chats.

The real challenge

Keeping three different interfaces feeling like one product. A shared design system, built around the XENPOP blue and the XEN coin, ties everything together.

- Year: 2026
- Scope: UI/UX design, design system, development

Building a product with an app, a website and an admin panel? Let's talk.

Roman English

Zyada tar crypto apps experts ke liye banti hain. XENPOP baaqi sab ke liye banaya gaya.

Din mein sirf ek tap. Poora idea yehi hai.

Adelogix Software Technology mein hamari team ne XENPOP design aur develop kiya. Ye ek community-powered crypto mining platform hai. Log apne phone se coins mine aur earn karte hain, baghair kisi special hardware ya technical setup ke.

Lekin mining app product ka sirf ek hissa hai. Humne poora platform banaya:

📱 **Mobile app (76 screens)**

- Tap-to-mine sessions, live countdown aur hourly rate ke saath
- Step-by-step KYC, document photos aur face check ke saath
- Wallet se coins send aur receive, QR code ke saath
- Invite friends, leaderboard aur market statistics
- Support chat, notifications aur two-factor authentication

🌐 **Website**

Ek dark aur focused landing page jo XENPOP samjhata hai aur visitors ko iOS aur Android download tak le jata hai.

🖥️ **Admin panel (16 screens)**

Ek web panel jahan team KYC requests review karti hai, users aur roles manage karti hai, transactions dekhti hai, announcements publish karti hai aur support chats ka jawab deti hai.

Asal challenge

Teen alag interfaces ko ek hi product jaisa feel karwana. XENPOP blue aur XEN coin par bana ek shared design system sab ko jorta hai.

- Saal: 2026
- Scope: UI/UX design, design system, development

Aap bhi app, website aur admin panel wala product bana rahe hain? Baat karte hain.

🪙 **Crypto mining, one tap a day.**

What if mining coins was as simple as opening an app?

That's XENPOP, a full platform designed and developed by the Adelogix Software Technology team in 2026.

- ✅ Mobile app with tap-to-mine sessions
- ✅ Step-by-step KYC verification
- ✅ Wallet with send, receive and QR codes
- ✅ Invite friends and a live leaderboard
- ✅ Landing page with iOS and Android downloads
- ✅ Admin panel for users, KYC, transactions and support

One product. Three touchpoints. One design system.

Project title: XENPOP | Crypto Mining App, Website & Admin Panel Case Study

Tagline: Crypto mining, one tap a day.

Easy English

XENPOP is a community-powered crypto mining platform. People mine and earn coins from their phone, with no special hardware and no technical setup. The Adelogix Software Technology team designed and developed the complete platform in 2026: a mobile app, a website and an admin panel.

One platform, three touchpoints

The website introduces XENPOP and sends people to the app stores. The app is where users mine, verify and send coins. The admin panel is where the team reviews and supports them.

Mobile app (76 screens)

- Tap-to-mine sessions with a live countdown, hourly rate and referral count
- KYC in five steps (document, name, date of birth, address, photos), then a face check
- Clear error states, such as a specific message and retake button for unclear photos
- Wallet: send coins in four screens, receive with a QR code
- Invite friends, leaderboard, market statistics and a future value calculator
- Support chat, direct messages, notifications and two-factor authentication

Website

A dark landing page with sections for what XENPOP is, why it matters, how it works, the roadmap, FAQs and contact, plus iOS and Android download buttons.

Admin panel (16 screens)

Dashboard, user management, KYC verification with approve and reject states, users list, transactions list, announcements, customer support chat, user roles and settings.

Design system

Poppins across all three interfaces, an action blue (#007BFF), warm coin tones (#F37E00, #DB3900) and a 3D XEN coin that ties the brand together.

- Scope: UI/UX design · Design system · Development
- Platforms: Mobile app · Website · Admin panel
- Year: 2026

XENPOP ek community-powered crypto mining platform hai. Log apne phone se coins mine aur earn karte hain, baghair kisi special hardware ya technical setup ke. Adelogix Software Technology ki team ne 2026 mein poora platform design aur develop kiya: mobile app, website aur admin panel.

Ek platform, teen touchpoints

Website XENPOP introduce karti hai aur logon ko app stores tak le jati hai. App mein users mine, verify aur coins send karte hain. Admin panel mein team unhein review aur support karti hai.

Mobile app (76 screens)

- Tap-to-mine sessions: live countdown, hourly rate aur referral count
- KYC paanch steps mein (document, naam, date of birth, address, photos), phir face check
- Clear error states, jaise unclear photo par specific message aur retake button
- Wallet: chaar screens mein coins send, QR code se receive
- Invite friends, leaderboard, market statistics aur future value calculator
- Support chat, direct messages, notifications aur two-factor authentication

Website

Ek dark landing page jismein XENPOP kya hai, kyun zaroori hai, kaise kaam karta hai, roadmap, FAQs aur contact ke sections hain, saath mein iOS aur Android download buttons.

Admin panel (16 screens)

Dashboard, user management, approve aur reject states ke saath KYC verification, users list, transactions list, announcements, customer support chat, user roles aur settings.

Design system

Teeno interfaces mein Poppins, action blue (#007BFF), warm coin tones (#F37E00, #DB3900) aur ek 3D XEN coin jo brand ko jorta hai.

- Scope: UI/UX design · Design system · Development

- Platforms: Mobile app · Website · Admin panel
- Saal: 2026

7. Search keywords and posting tips

Search keywords (SEO and profile search): crypto mining app UI design, crypto app case study, mobile app and admin panel design, KYC verification UI, crypto wallet app design, admin dashboard design, landing page design, fintech app design, app design system, mobile app development company Pakistan, UI/UX agency Bahawalpur, Adelogix Software Technology

Posting tips

- Keep the first 2 lines of every post as they are. They are the hook that shows before "see more".
- Post on Behance first, then add the Behance link to the Dribbble and LinkedIn posts.
- On Instagram, post all 12 images as one carousel, in order from 01 to 12.
- All posts describe features only, with no promises about earnings or returns. That is safer for crypto content on LinkedIn and Facebook.
